

Report on World Water Day

22nd March, 2024

The Institute of Vocational Studies celebrated World Water Day on March 22, 2024, under the guidance of Dr. Mandira Gupta, Principal of IVS, and coordinated by Dr. Parul Maheshwari, Ms. Sapna Rani and Megha Singh Rathore. This annual event aims to emphasize the importance of freshwater and advocate for its sustainable management. This year's theme, "Leveraging Water for Peace," underscored the imperative to utilize water resources as a catalyst for cooperation. Among the key issues addressed was water scarcity, which is impacting various regions globally due to factors such as population growth, urbanization, and climate change. Tackling this challenge necessitates the implementation of sustainable management practices and conservation efforts.

Another significant concern discussed was water pollution, arising from industrial runoff, agricultural chemicals, and untreated sewage. This pollution poses severe threats to human health and ecosystems, necessitating the enforcement of stricter regulations, the adoption of enhanced wastewater treatment methods, and the implementation of public awareness campaigns. Additionally, adaptation and mitigation strategies were identified as crucial for safeguarding water resources in the face of climate change. Regarding initiatives and solutions, promoting water conservation practices such as rainwater harvesting, efficient irrigation techniques, and minimizing water waste emerged as pivotal steps to mitigate water scarcity and encourage sustainable water usage. World Water Day serves as a poignant reminder of the essential role fresh water resources play in human well-being, economic development, and ecosystem health.

Addressing water-related challenges demands collective action, innovative solutions, and sustained commitment from governments, businesses, civil society, and individuals globally. Through collaborative efforts aimed at protecting and sustainably managing water resources, we can ensure a water-secure future for

generations to come. On the occasion of World Water Day, students and faculty members of IVS discussed their views on **Dry Water** for peace and harmony.
